SOLAR BEACON FEATURES

- Super bright LEDs (flash frequency 74±5 times/min)
- Available in red, yellow, white, blue or green
- Flashes up to 3 nights from full solar panel charge
- Automatic light sensitive ON / OFF functionality
- Visible from 500m distance
- Class 1 coloured reflective band to match LED colour
- Fully sealed from water and dust
- Bracket for vertical or horizontal mounting available
- Beacon height 155mm (200mm with bracket)
- Can be placed directly into top of traffic cones

The accompanying storage case (sold separately) is a lockable plastic carry case which holds up to 6 Solar Warning Beacons. The case is fully sealed from dust and water penetration, and has an inner foam membrane to protect the contents against excessive shock.

Outside dimensions 430mm x 530mm x 140mm
